## QLD COVID-19 update (28.04.2020, 0300 pm)

- In Queensland about 100,000 COVID-19 tests performed as state warned not to cause a second wave of infections. 2,377 tests undertaken in the previous 24 hours.
- Early tests of a potential COVID-19 vaccine have shown promising results against the deadly virus, Queensland researchers say. The University of Queensland's COVID-19 vaccine has shown in pre-clinical tests it can raise high levels of antibodies that can neutralise the virus. The university's project co-leader Professor Paul Young said the results were an excellent indication the vaccine worked as expected. The final results from pre-clinical tests are hoped to be in by **early June** before clinical trials can start.

**1033 in QLD**  
No new cases

DAYS OF NO NEW CASES  
**1**

**926 Cases recovered**  
90.4%

## Australia wide

HELP STOP THE SPREAD AND STAY HEALTHY

**Australia** (28.04.2020, 0300 pm)  
**6,731 Total cases confirmed**  
**84 Deaths confirmed**

**5,626 Cases recovered**83.6%

GROWTH FACTOR  
**1.2**

### Latest updates:

- QLD 1033, NSW 3,009, ACT 106, NT 27, SA 438, TAS 217, VIC 1,381, WA 550.
- No new cases reported in, Queensland, NT, South Australia.
- New South Wales will relax its coronavirus shutdown this week to allow people to see their friends. From Friday, groups of two adults — and their children if they have any — will be able to visit other households for social gatherings.
- Four new coronavirus cases confirmed in Tasmania. Three of the cases are healthcare workers in the state's north-west.

## World Situation

**Italy**

Prime Minister Giuseppe Conte said the government was taking a "calculated risk" in allowing 4.5 million people return to work as of next Monday, and could not afford bolder action like reopening schools. A relaxation of stay-at-home rules is also on the agenda for May 4th. Italy has over 200,000 cases.

---

**Worldwide Cases**  
(29.04.2020, 0600 am)

**3,094,829** Total cases confirmed  
**947,126** Total recovered  
**215,461** Deaths confirmed

The true figure is expected to be far higher due to the lack of widespread testing in many countries.
